

# Laboratory Exercise No. 1: Development Environment Setup

Course: Web Systems and Technologies 2 | Student: Jhon Joseph Evora

## Part I – Local Server Installation (WAMP)

The screenshot displays the Wampserver control panel. At the top, the Wampserver logo is followed by the text "Wampserver" and "Apache 2.4 - MySQL 5, 8 & 9 - MariaDB 10 & 11 - PHP 5, 7 & 8". A version dropdown menu shows "Version 3.4.0 - 64bit" with "english" and "classic" themes. The "Server Configuration" section lists: Apache Version: 2.4.65 - Documentation Apache - Loaded Apache modules; Server Software: Apache/2.4.65 (Win64) PHP/8.4.15 mod\_fcgid/2.3.10-dev - Port defined for Apache: 80; PHP Version: [Apache module] 8.4.15 - Documentation PHP - Loaded PHP extensions - Use of PHP versions [root] 8.0.30 - 8.1.33 - 8.2.29 - 8.3.28 - 8.4.15 - 8.5.0 - 8.5.1 - FCGI mode help; MySQL Version: 8.4.7 - Port defined for MySQL: 3306 - default DBMS - Documentation MySQL; and MariaDB Version: 11.4.9 - Port defined for MariaDB: 3307 - Documentation MariaDB - MySQL - MariaDB. Below this, four sections are visible: "Tools" with links to phpinfo(), xdebug\_info(), PhpSysInfo 3.4.4, and Add a Virtual Host; "Your Projects (1)" showing a folder "D1" with instructions to use the path in c:\wamp64\www; "Your Aliases (2)" listing phpmyadmin 5.2.3 and adminer 5.4.1; and "Your VirtualHost (1)" showing localhost. A "Wampserver Forum" link is at the bottom. The Windows taskbar at the bottom shows the date as 8/7/2026 and time as 8:39 PM.

## Part II – Git Installation Verification

## Part III – GitHub Account Profile

The screenshot shows a GitHub profile page for the user **evorajhonj**. The profile is for **Jhon Joseph Evora**, located in the Philippines. The profile includes a bio, achievements, and highlights. The main content area displays a README file titled **ACCESS GRANTED** with a green header. The README content includes a terminal session log showing the user's role as a Software Developer & IT Student at MISU, their focus on Backend, APIs, Cloud, and DevOps, and their current goal of shipping reliable software. Below the README, there are quick links to the user's GitHub profile, portfolio, LinkedIn, and status (AVAILABLE). The featured projects section lists **WinForms.Fluent**. The browser's address bar shows the URL <https://github.com/evorajhonj>. The Windows taskbar at the bottom shows the system clock as 9:01 PM on 8/7/2026.

evorajhonj / README.md

### ACCESS GRANTED

```
# /var/log/boot.log
[ OK ] Mounted profile filesystem.
[ OK ] Initialized CR1-green terminal interface.
[ INFO ] Starting session for @evorajhonj...

$ whoami && hostnamectl --pretty
Jhon_Joseph_Evora
GitHub • Terminal Session

$ neofetch --minimal
Role : Software Developer & IT Student @ MISU
Focus : Backend • APIs • Cloud • DevOps
Now : Shipping reliable software and improving developer experience

$ cat about.txt
I design clean architectures, build reliable services, and turn ideas into shipped products.
I value maintainability, performance, thoughtful automation, and continuous learning.
```

## Part IV – Composer Installation Verification

## Part V – LavaLust Framework Running

## Part VI – Render Dashboard

## Part VII – Aiven Dashboard

The screenshot shows the Aiven dashboard interface. At the top, a navigation bar includes links for Home, Projects, Tools, Billing, Support, and Admin. A banner at the top center states: "Aiven platform trial is active. 30 days left to use \$50.00 USD trial credits on non-free plan services. Upgrade options". The left sidebar lists navigation options: PROJECT evorajhonj, Get started, Services, Runtime, Integration endpoints, VPCs, Event log, Permissions, Project AI insights, and Settings. The main content area is titled "Create new service" and displays a grid of service cards:

- PostgreSQL®**: PostgreSQL - High-performance relational database with advanced extensions
- Apache Kafka®**: Kafka - Distributed event streaming platform for high-throughput data pipelines
- OpenSearch®**: OpenSearch - Distributed real-time search and analytics
- ClickHouse®**: ClickHouse - Fast resource-effective data warehouse for analytical workloads
- Valkey**: Valkey - High-performance key/value datastore
- Dragonfly**: Dragonfly - Scalable in-memory data store for high-performance workloads
- Aiven for Metrics**: Thanos Metrics - Scalable Prometheus query solution
- MySQL**: MySQL - Popular general-purpose easy-to-use relational database
- Grafana®**: Grafana - Data visualization and analytics platform

At the bottom of the main content area, a disclaimer states: "Apache, Apache Kafka, Kafka, Apache Flink, and Flink are either registered trademarks or trademarks of the Apache Software Foundation in the United States and/or other countries. ClickHouse, OpenSearch, PostgreSQL, MySQL, Grafana, Dragonfly, Valkey, Terraform, and Kubernetes are trademarks and property of their respective owners. All product and service names used in this website are for identification purposes only and do not imply endorsement."

The right sidebar shows the user profile for Jhon Joseph Evora, with links to User profile, Organizations, Authentication, Tokens, Feature previews, and Referrals. A "Log out" button is also present. The bottom of the dashboard shows a Windows taskbar with the date 8/7/2026 and time 8:42 PM.
